EXPERIENCE

CAPITAL ONE / SENIOR SOFTWARE ENGINEER — *NEW YORK, NY*

APRIL 2023 – PRESENT

Working to support and transform microservices for the Account Setup team within the Card Tech domain utilizing Golang and AWS.

TITAN / SOFTWARE ENGINEER — *NEW YORK, NY*

APRIL 2022 – FEBRUARY 2023

Worked as a full-stack engineer alongside design, product, and customer experience teams to build and support the Titan iOS and Android mobile app with React Native + Typescript as well as backend services and APIs with Node + Typescript and GraphQL.

IBM / SOFTWARE DEVELOPER — *RALEIGH, NC*

SEPTEMBER 2020 – APRIL 2022

Modernized legacy internal web pages by refactoring backend Java code and rewriting frontend pages in React using IBM's Carbon Design System

JULY 2018 – SEPTEMBER 2020

Developed and supported a message-oriented middleware B2B application on the IBM Cloud that provides opportunity, lead, and incentive management capabilities for IBM Business Partners by interfacing with internal IBM APIs and ESBs.
